

# Canadian Barley

## Bulk Program Spec Sheet

Feed / General Purpose | Food | Hulless | Malting (program-based)

Bennett's Seed

bspco.ca

info@bspco.ca

Origin	Canadian Prairies (Saskatchewan-led programs)
Common uses	Feed, brewing/malting programs, milling and food ingredients
Supply model	Contract-based programs with lot allocation, lot IDs, and documentation

### Program options

- **General purpose / feed barley** (contract-based supply; CGC-aligned grade tables).
- **Food barley** (buyer selection criteria; graded under CGC food tables; two-row/six-row and hulless options).
- **Hulless barley** (food ingredient and specialty programs; contract parameters by end-use).
- **Malting barley** (buyer selection criteria; graded under CGC malting tables; contracts set by maltsters/brewers).

### Typical contract parameters (set by buyer, confirmed by lot)

Parameter	How it is handled
Program / end-use	General purpose/feed, food, hulless food, or malting (as contracted).
Class / type	CW / CE; two-row or six-row; hulled or hulless (as applicable).
Grade	Canada grades per CGC tables (as contracted).
Moisture	Contract maximum for storage and destination requirements.
Dockage / extraneous material	Contract maximum; determined using CGC procedures.
Admixture / other types	Contract maximum; buyer targets may be tighter.
Malting-specific (if applicable)	Germination, protein target, plumpness, skinned/broken, pre-germination and other buyer parameters.
Optional (by request)	Mycotoxins, residues, or other buyer-required verification.

### Cleaning & handling options

- Cleaning to contract targets (dockage/admixture).
- Sorting options for visual and physical uniformity (program-based).
- Metal detection prior to packing (where required).

### Packaging, logistics & docs

- Packaging: bulk (program-dependent), 25 kg bags, or 1 MT totes.
- Terms: FOB / CIF / DAP based on destination and contract.
- Lot IDs per shipment (traceability) + standard shipping documents.
- COA / analysis summary (on request) + destination-aligned export documentation pack.
