

Canada Western Amber Durum (CWAD) Wheat

Bulk program supply for domestic Canada and export markets. Contract specs confirmed by lot IDs and documentation.

Origin	Canadian Prairies (SK/AB focus)	Programs	By grade (CWAD) + buyer targets (protein, HVK, moisture, dockage)
Supply model	Contract grower supply; cleaned/graded/packed near origin; allocated to Bennett's Seed for final sales	Typical uses	Semolina and pasta, couscous, milling

CGC Grade Framework (Export Grade Determination - CWAD)

Grade	Min test weight kg/hL	Min HVK %	Min protein %
No. 1 CWAD	80	80	9.5
No. 2 CWAD	79	60	No minimum
No. 3 CWAD	78	40	No minimum
No. 4 CWAD	75	No minimum	No minimum

Reference: Canadian Grain Commission (CGC), Official Grain Grading Guide - Export grade determination table for CWAD (grainscanada.gc.ca/.../cwad-wheat.html).

Typical Buyer Contract Parameters (Set by Buyer, Confirmed by Lot)

- Grade: CWAD No. 1 / No. 2 / No. 3 (as contracted)
- Protein: per contract target (method and basis defined in contract)
- Test weight: target aligned to grade and buyer requirement (kg/hL)
- HVK (vitreousness): grade determinant and buyer target (%)
- Moisture: contract maximum
- Dockage / foreign material: contract maximum
- Optional: falling number, mycotoxin screens, residues, other buyer-required tests (by request)
