

Canadian Flaxseed

Bulk Program Spec Sheet

Brown | Golden | Certified Organic (program-based)

Bennett's Seed

bspco.ca

info@bspco.ca

Origin	Canadian Prairies (Saskatchewan-led programs)
Common uses	Food ingredients, milling, oil processing, specialty and industrial programs
Supply model	Contract-based programs with lot allocation, lot IDs, and documentation

Program options

- **Brown flaxseed** (conventional; common for food, feed, and industrial programs).
- **Golden flaxseed** (colour-driven food programs where appearance matters).
- **Certified organic flaxseed** (program supply where available; documentation aligned to contract requirements).

Typical contract parameters (set by buyer, confirmed by lot)

Parameter	How it is handled
Type / program	Brown / Golden / Organic (as contracted).
Grade	Canada grades aligned to CGC framework (as applicable).
Moisture	Contract maximum.
Dockage / extraneous material	Contract maximum; dockage determination is CGC-aligned.
Admixture / foreign material	Contract maximum; tighter buyer targets available.
Oil content (optional)	Buyer target where required.
Optional (by request)	Residues, microbiological/food-safety screens, other buyer-required tests.

Cleaning & handling options

- Cleaning to contract targets (dockage/admixture).
- Optional sorting for visual consistency (buyer-driven).
- Metal detection prior to packing (where required).

Packaging, logistics & docs

- Packaging: bulk (program-dependent), 25 kg bags, or 1 MT totes.
- Terms: FOB / CIF / DAP based on destination and contract.
- Lot IDs per shipment (traceability) + standard shipping documents.
- COA / analysis summary (on request) + destination-aligned export documentation pack.
